

## RESEARCH FUNDERS

### **The Story So Far**

Since 2007, Tour de Cure (TDC) has raised over \$118-million and funded 1000 cancer projects. We know that every dollar donated is critical to curing cancer - and treat them accordingly.

Our grant allocation process is benchmarked against world's best practice and run with meticulous corporate rigour by an expert panel of leading medical researchers and doctors, and cancer survivors.

This attention to detail has paid off with an impressive 150 scientifically recognised cancer breakthroughs.

### **The Need**

Behind those numbers lies significant unmet need. Each year, TDC can only fund about one quarter of all applications received.

Our expert panel stresses that hundreds of projects that miss the cut have real potential to achieve cancer breakthroughs.

### **The Opportunity**

In a bid to close this gap, TDC is giving you the opportunity to directly fund a project as an individual, a family foundation, or with a group of friends. You can also share this opportunity with anyone you know who may be interested.

Because we are cancer agnostic, you can choose from all types of cancer – even rare cancers and very specific small subsets (e.g. Triple Negative Breast Cancer).

You can support researchers at any career stage - PhD to Senior Researcher.

We'll work with you to identify the project and researcher that's just right. As well as how you'd like to be acknowledged, how you'd like to structure the giving and how much information you'd like on how the project is going as the year progresses.

### **Next Steps**

Contact Philanthropy Manager Matt Clarke [matt@tourdecure.com.au](mailto:matt@tourdecure.com.au) to find out more and discuss what you are looking for.

Minimum Donation is \$10,000.
